CHAPTER I

THE DISCOVERY OF AMERICA

THE first discovery of America was made by Christopher Columbus in 1492. He was an Italian explorer who sailed for Spain. He discovered the New World, which was then called America.

After his discovery, Columbus made several more voyages to the New World. He explored the Caribbean Sea and the Gulf of Mexico. He also discovered the island of Cuba and the mainland of North America.

Columbus's discovery of America was a great event in the history of the world. It opened up a new world of exploration and discovery. It also led to the colonization of America by Europeans.

The first European to settle in America was John Cabot. He was an Italian explorer who sailed for England. He discovered the coast of North America in 1497.

After Cabot's discovery, many other Europeans came to America. They came to explore, to trade, and to settle. They brought with them new ideas, new technologies, and new diseases.

The first European to settle in America was John Cabot. He was an Italian explorer who sailed for England. He discovered the coast of North America in 1497.

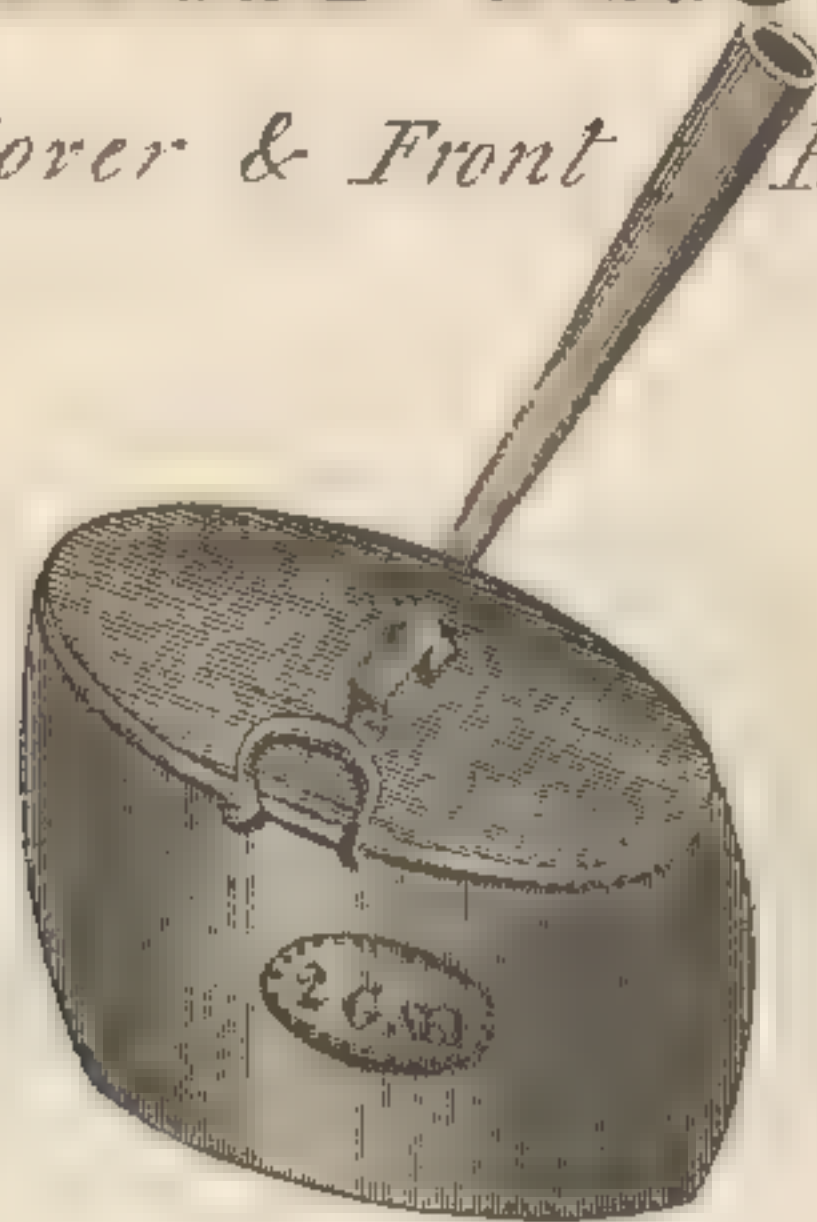

After Cabot's discovery, many other Europeans came to America. They came to explore, to trade, and to settle. They brought with them new ideas, new technologies, and new diseases.
